

Documentation: Steps of the physical transformation of the place:

- Restoration of the farm workers' house
- Construction of a chicken pen and pig stall by erecting self-constructed alternative prefabricated elements (half-timbered walls with straw-loam mixture), later conversion into a small residential house
- Reconstruction of a former half-timbered barn and conversion into a "breathing" and perfectly insulated residential house
- Installation of a rainwater cistern and hot water elements
- Connection of the farm worker's house with the half-timbered house by means of a winter garden
- Construction of a barn and wood workshop
- Construction of a seminar house with offices, kitchen and sanitary facilities
- Construction of a studio with glass front
- Extension of the grounds, planting of hedges (hawthorn), creation of a rainwater-fed pond, creation of a vegetable garden, new planting of old varieties of fruit trees, creation of the herb garden, moving in and caring for a bee colony, construction of an insect hotel
- Construction of a goat shed, made of logs, sealed with a mixture of wool and clay and covered with a specially constructed thatched roof; in 2021, conversion into a farm chapel.
- Construction of a small café house
- Construction of the exhibition hall
- Construction of a small residential building
- 2021, construction of a second insect hotel
- 2021, Establishment of the second permaculture vegetable garden
- 2021, Construction of a shed for carriage, tractor and implements
- 2021, Installation of two rainwater cisterns
- 2021, Paving of the driveway
- 2021, Design and paving of the work yard

Happy completion of all construction measures in November 2021.
